

SNC[®]

Vindlér[™]

SNC is a pioneer in developing advanced algorithms and analytics. SNC deployed a new space-based collection service to address a growing market need for radio frequency (RF) data and analysis. SNC's collection and analysis service leverages our satellites to offer customers geo-located RF analysis products. This collection-as-a-service model provides valuable commercial capabilities to drive understanding of RF emissions in contested environments to support across the ever-changing signals battlespace.

FEATURES

- **Multiple clusters** in LEO orbit
- **Collects frequencies** UHF, VHF, L, S (X, KU/KA coming in 2025)
- **Geolocation datasets** with industry leading accuracy
- **Industry leading data downlinks**
- **Low-latency delivery** for time sensitive operations
- **Growing constellation** with custom mission payloads
- **RF Data catalog** & multi-modal analytics
- **Hosted Payload** consultation for payload integration & optimization
- **Single signal detects** (expanding to simultaneous in 2025)
- **Coming in 2025** – three additional ESPA Class Sats

DELIVERY OF RAW IQ & GEOLOCATION FILES

Vindlér collects on multiple signals & emitters of interest.

- Push-to-talk radios
- Maritime radar
- Satellite phones
- GNSS jammers
- V-sat terminals

SPECIFICATIONS

- | | |
|------------------|---------------------|
| • Orbit | LEO |
| • Altitude | 550km |
| • Sensor Control | SNC |
| • Downlink | Revisit twice daily |

Intuitive analyst interface
